3.

The domain is all values that s is allowed to be.
Since I can't divide by zero (division by zero isn't allowed,
I need to find all values of s that would cause division by zero.
The domain will then be all other s-values.
When is this denominator equal to zero?
$s^2 - 1 = 0$
$s = \pm 1$ then the domain of p is $\{s \mid s \neq 1 \text{ or } -1\}$
