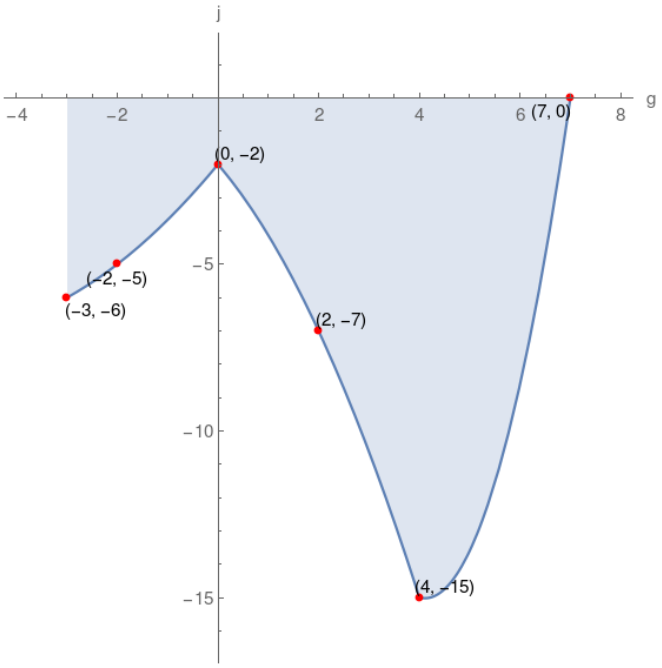
5. Given the graph of function j, which of the following choices is correct?



$j(-3)$ is positive	$j(0)=-2$	range of $j=[-15,0]$
j-intercept $=(0,-2)$	$j(-2)$ is negative	$j(2)=-6$
g-intercept $=(7,0)$	domain of $j=[-3,7]$	$j(7)=0$

$j(2)=-7$	domain of $j=[-2,8]$	range of $j=[-16,-1]$
$j(-2)=-5$	$j(4)$ is negative	j-intercept $=(0,-2)$
$j(0)=-2$	g-intercept $=(7,0)$	$j(7)$ is positive

$j(-3)=-6$	domain of $j=[-3,7]$	g-intercept $=(7,0)$
$j(2)=-7$	$j(0)=-2$	$j(-2)$ is negative
range of $j=[-15,0]$	j-intercept $=(0,-2)$	$j(7)$ is zero

domain of $j=[-3,7]$	$j(-2)=-6$	range of $j=[-15,0]$
$j(2)=-7$	$j(7)$ is zero	$j(4)$ is negative
j-intercept $=(0,-1)$	g-intercept $=(7,0)$	$j(0)=-2$

Solution
