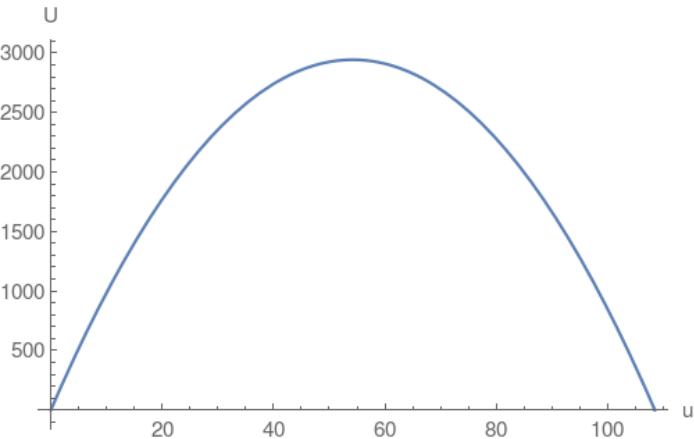
3.

3. Perimeter of rectangle $= 2(u+a) = 217$ where a is the length of the other edge of rectangle. Area of the rectangle is $= u \times a$.
Use perimeter equation
and solve for $a = \frac{217-2u}{2}$

Then reformulate the area $U = u \times a = \frac{217\,u}{2} - u^2$ which turns out to be a quadratic Parabola:



Compute the vertex $\frac{217}{4}$ and then plug the vertex into the area which will compute the maximum area.
