

4.

4. Since the fences enclose a rectangular plot without one side, two sides have length b and one side has length a :

$$a+b+b=4661 \implies a=4661-2b$$

the area:

$$\text{area}=a \times b = (1-2b)b = 4661b - 2b^2$$

Note that the function is for parabola. Now compute the vertex:

$$\text{vertex} = \left(\frac{4661}{4} \text{ ft} , \frac{21724921}{8} \text{ ft}^2 \right)$$

Square the unit for vertex's vertical coordinate since it is a quadratic.
