

Plotting the Parabola

How to plot : $e(r) = a r^2 + b r + c$

Step 1.

Examine the sign for the leading coefficient

If $a > 0$ then the valley shape:

If $a < 0$ then the hill shape:

Step 2.

Compute the vertex: $(-\frac{b}{2a}, e(-\frac{b}{2a}))$

Step 3.

Compute the e-intercept by setting $r=0$, $0^2 a + 0 b + c = c$

Step 4.

Compute the r-intercepts by solving: $a r^2 + b r + c = 0$

Step 5.

Sketch a rough plot, try to connect vertex to intercepts:
