

## Example 1. 2 horizontal intercepts found

Plot  $r(u) = -u^2 + 2u + 19$

### Step 1.

Compute vertex and plot single point:

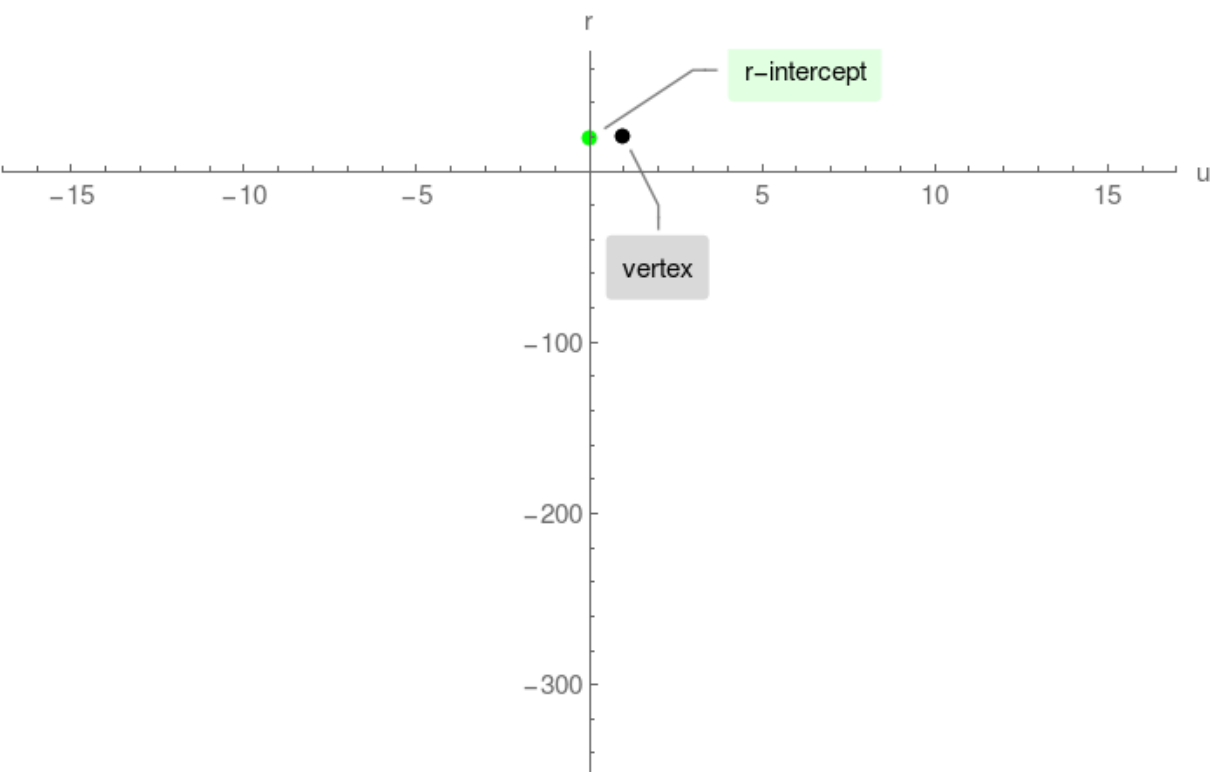

vertex =  $(1, 20)$

### Step 2.

Compute r-intercept and plot single point:

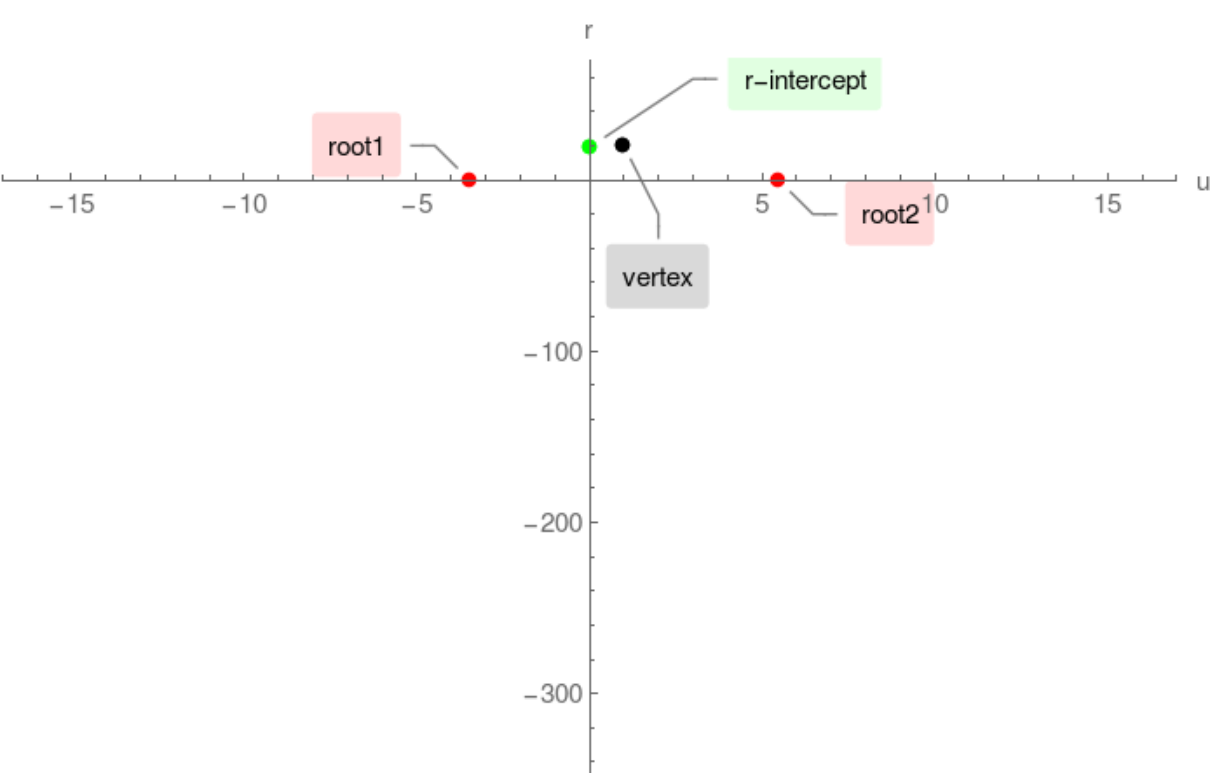

r-intercept =  $(0, 19)$

### Step 3.

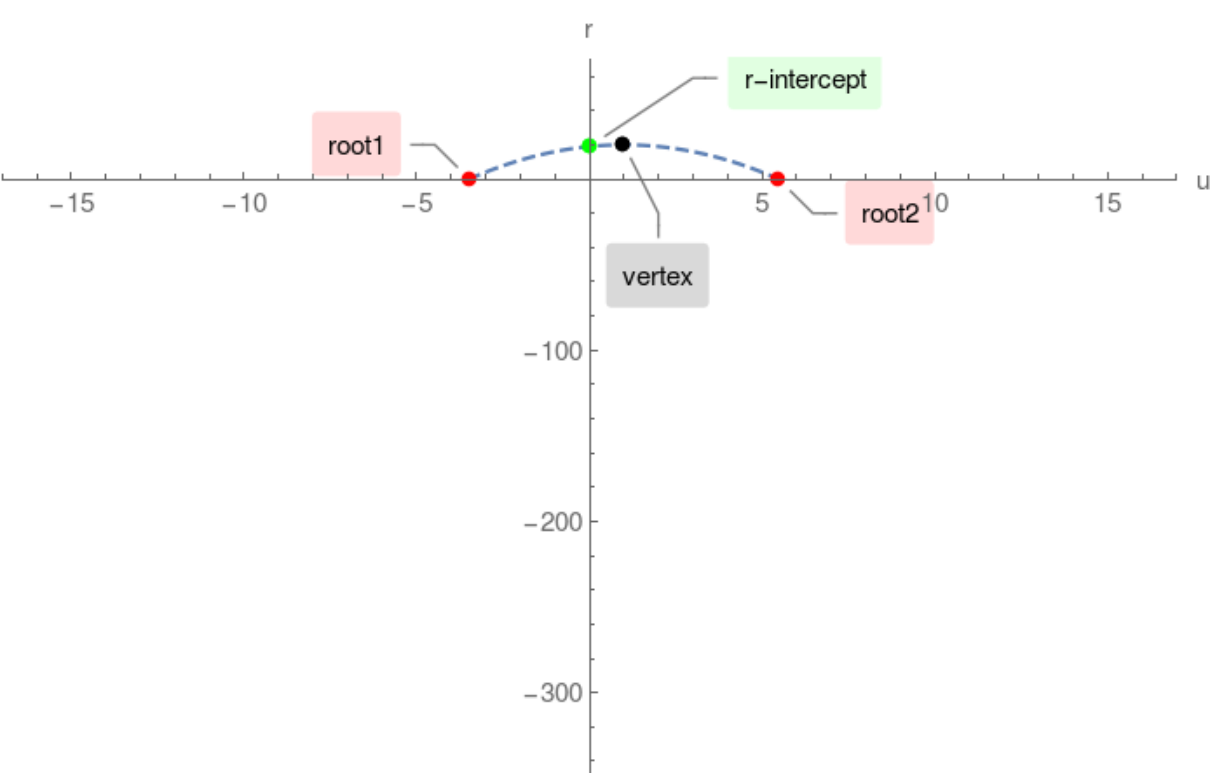

Compute u-intercepts by solving  $-u^2 + 2u + 19 = 0$ :

$(1 - 2\sqrt{5}, 0)$ ,  $(1 + 2\sqrt{5}, 0)$

### Step 4.

connect the above computed points:

### Step 5.

Extend the parabola beyond the range of intercepts
