

# Plotting the Parabola

How to plot :  $n(d) = a d^2 + b d + c$

## Step 1.

Examine the sign for the leading coefficient

If  $a > 0$  then the valley shape:

If  $a < 0$  then the hill shape:

## Step 2.

Compute the vertex:  $(-\frac{b}{2a}, n(-\frac{b}{2a}))$

## Step 3.

Compute the n-intercept by setting  $d=0$ ,  $0^2 a + 0 b + c = c$

## Step 4.

Compute the d-intercepts by solving:  $a d^2 + b d + c = 0$

## Step 5.

Sketch a rough plot, try to connect vertex to intercepts:
