

2.

The domain is all values that c is allowed to be.

Since I can't divide by zero (division by zero isn't allowed,
I need to find all values of c that would cause division by zero.

The domain will then be all other c -values.

When is this denominator equal to zero?

$$c^2 - 7c + 12 = 0$$

$c = 3$ or 4 then the domain of f is $\{c \mid c \neq 3 \text{ or } 4\}$
