

جدي مجموعة حل المعادلات الآتية في ص:

a.  $7u + 2 = 30$

b.  $x - 7 = 4$

$$\begin{aligned} u &= 7 \\ x &= 11 \end{aligned}$$

$$\begin{aligned} u &= 7 \\ x &= -3 \end{aligned}$$

$$\begin{aligned} u &= 4 \\ x &= 11 \end{aligned}$$

$$\begin{aligned} u &= 4 \\ x &= -3 \end{aligned}$$

**Solution**

a.  $7u + 2 = 30$

$$7u = 30 - 2$$

$$u = \frac{28}{7}$$

$$u = 4$$

b.  $x - 7 = 4$

$$x = 4 + 7$$

$$x = 11$$
