

1. Given the graph of function k , which of the following choices is correct?

range of $k = [-12, 0]$	k -intercept = $(0, -2)$	$k(-5) = -12$
domain of $k = [-8, 4]$	$k(0)$ is negative	u -intercept = $(-8, 0)$
$k(3) = -5$	$k(4) = -6$	$k(-2)$ is positive

k -intercept = $(0, -2)$	$k(-2) = -6$	u -intercept = $(-8, 0)$
$k(-8)$ is positive	domain of $k = [-7, 5]$	$k(-5)$ is negative
$k(3) = -5$	range of $k = [-13, -1]$	$k(4) = -6$

$k(0) = -2$	$k(-8)$ is zero	$k(3)$ is negative
range of $k = [-12, 0]$	k -intercept = $(0, -2)$	$k(4) = -6$
domain of $k = [-8, 4]$	u -intercept = $(-8, 0)$	$k(-2) = -6$

$k(-2) = -7$	range of $k = [-12, 0]$	$k(4) = -6$
$k(-8)$ is zero	k -intercept = $(0, -1)$	domain of $k = [-8, 4]$
$k(0) = -2$	$k(3)$ is negative	u -intercept = $(-8, 0)$

Solution
