

3.

The domain is all values that p is allowed to be.

Since I can't divide by zero (division by zero isn't allowed,
I need to find all values of p that would cause division by zero.

The domain will then be all other p -values.

When is this denominator equal to zero?

$$p^2 - 25 = 0$$

$p = \pm 5$ then the domain of i is $\{p \mid p \neq 5 \text{ or } -5\}$
