

جدي مجموعة حل المعادلات الآتية في ص:

a.  $7u + 2 = 44$

b.  $k - 7 = 6$

$$\begin{aligned} u &= 9 \\ k &= 13 \end{aligned}$$

$$\begin{aligned} u &= 9 \\ k &= -1 \end{aligned}$$

$$\begin{aligned} u &= 6 \\ k &= 13 \end{aligned}$$

$$\begin{aligned} u &= 6 \\ k &= -1 \end{aligned}$$

**Solution**

a.  $7u + 2 = 44$

$$7u = 44 - 2$$

$$u = \frac{42}{7}$$

$$u = 6$$

b.  $k - 7 = 6$

$$k = 6 + 7$$

$$k = 13$$
