

1.

The domain is all values that s is allowed to be.

Since I can't divide by zero (division by zero isn't allowed,
I need to find all values of s that would cause division by zero.

The domain will then be all other s -values.

When is this denominator equal to zero?

$$s^2 - 6s + 5 = 0$$

$s = 5$ or 1 then the domain of j is $\{s \mid s \neq 5 \text{ or } 1\}$
