

## Example 2. No horizontal intercepts found

Plot  $y(t) = t^2 + 8t + 176$

### Step 1.

Compute vertex and plot single point:

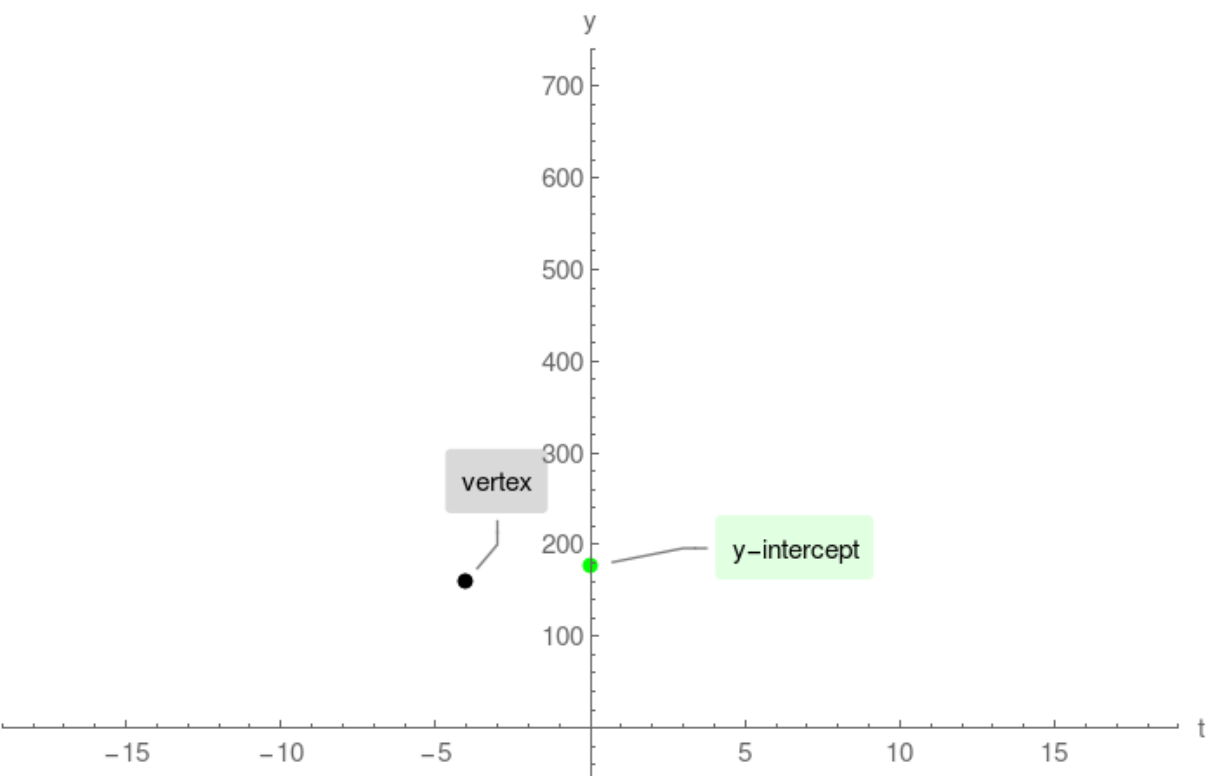

vertex =  $(-4, 160)$

### Step 2.

Compute y-intercept and plot single point:

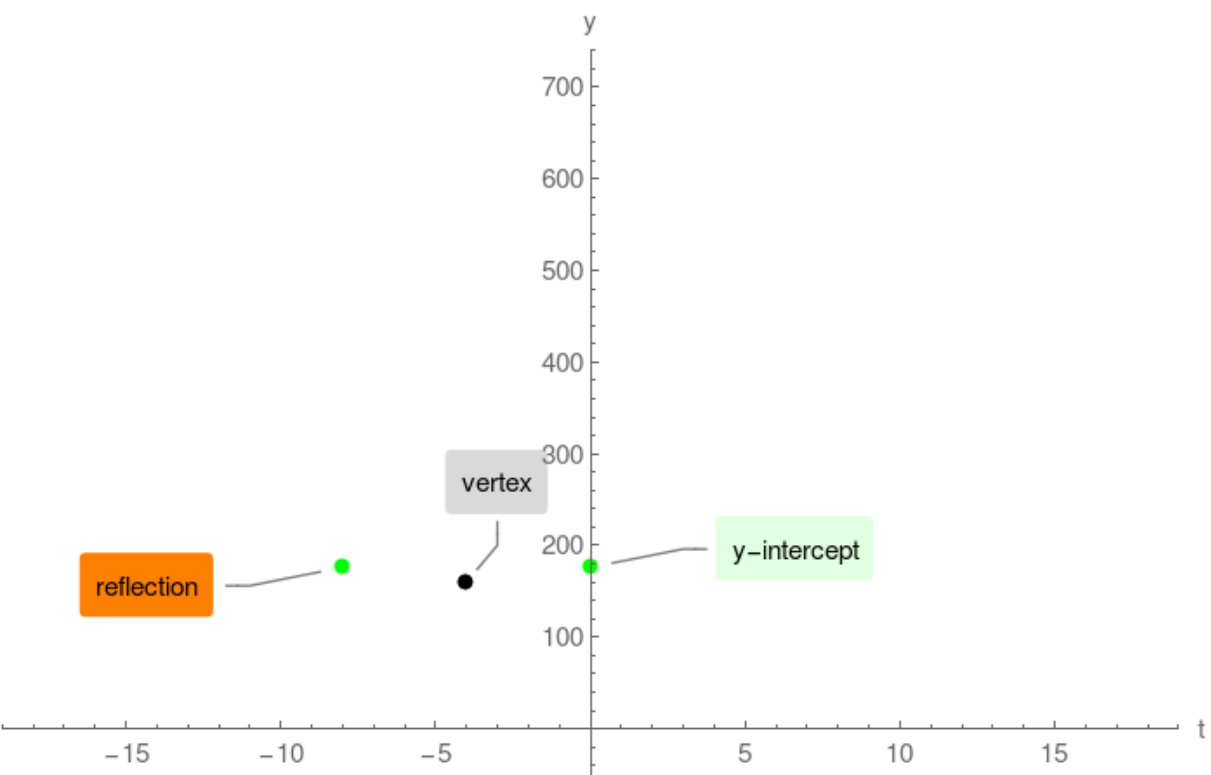

y-intercept =  $(0, 176)$

### Step 3.

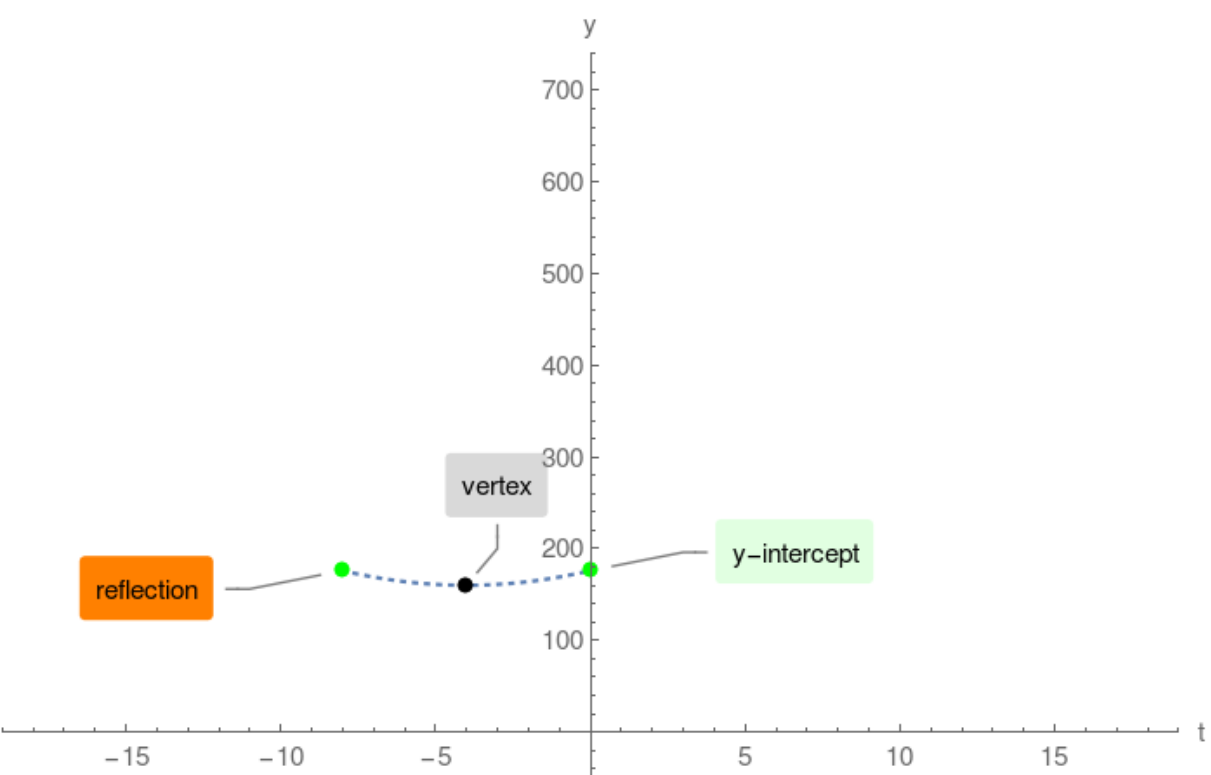

Compute y-intercept reflected against vertex,

reflection =  $(-8, 176)$

### Step 4.

connect the above computed points:

### Step 5.

Extend the parabola beyond the range of intercepts
