

2. Given the graph of function  $h$ , which of the following choices is correct?

e-intercept = $(0,0), (-7,0)$	$h(2) = -5$	$h(3) = -5$
$h(-7) = 0$	$h(0)$ is zero	range of $h = [-12, 0]$
$h(-4)$ is positive		domain of $h = [-7, 3]$

e-intercept = $(0,0), (-7,0)$	$h(0) = 0$	range of $h = [-13, -1]$
$h(2) = -5$	$h$ -intercept = $(0,0)$	$h(-2)$ is negative
$h(3) = -6$	$h(-4)$ is negative	domain of $h = [-6, 4]$

$h(3)$ is negative	range of $h = [-12, 0]$	e-intercept = $(0,0), (-7,0)$
domain of $h = [-7, 3]$	$h(-2) = -6$	$h(0)$ is zero
$h(-7) = 0$	$h$ -intercept = $(0,0)$	$h(2) = -5$

$h(2)$ is negative	$h$ -intercept = $(0,1)$	$h(-4)$ is negative
$h(0) = 0$	$h(-7) = -1$	domain of $h = [-7, 3]$
e-intercept = $(0,0)$	$h(-2) = -6$	range of $h = [-12, 0]$

**Solution**
