

4. Given the graph of function n , which of the following choices is correct?

n -intercept = $(0, -1)$	$n(-5)$ is positive	m -intercept = $(-8, 0)$
domain of $n = [-8, 3]$	$n(-2) = -5$	range of $n = [-12, 0]$
$n(0) = -1$	$n(-8)$ is zero	$n(2) = -5$

$n(0)$ is negative	$n(-8) = 0$	m -intercept = $(-8, 0)$
range of $n = [-13, -1]$	$n(3) = -6$	$n(2)$ is negative
n -intercept = $(0, -1)$	domain of $n = [-7, 4]$	$n(-5) = -12$

$n(-2) = -6$	$n(2) = -5$	$n(-8) = 0$
range of $n = [-12, 0]$	domain of $n = [-8, 3]$	m -intercept = $(-8, 0)$
$n(3)$ is negative	n -intercept = $(0, -1)$	$n(-5)$ is negative

$n(0) = -2$	$n(3) = -6$	$n(-8) = 0$
$n(-2)$ is negative	$n(-5)$ is negative	domain of $n = [-8, 3]$
range of $n = [-12, 0]$	m -intercept = $(-8, 0)$	n -intercept = $(0, 0)$

Solution
