

4.

4. Since the fences enclose a rectangular plot without one side, two sides have length b and one side has length a :

$$a + b + b = 3480 \implies a = 3480 - 2b$$

the area:

$$\text{area} = a \times b = (1 - 2b) b = 3480 b - 2 b^2$$

Note that the equation is for parabola. Now find the vertex:

$$\text{vertex} = (870 \text{ feet}, 1513800 \text{ feet}^2)$$

Square the unit for vertex's vertical coordinate since it is a quadratic.
