

1.

1. (1) Basis for the Revenue model is a simple multiplication:

$$\text{Revenue} = \text{Price} \times \text{Quantity} = \left(-\frac{4}{3}a + 244\right) \times a = 244a - \frac{4a^2}{3}$$

Notice the latter is a quadratic:

(2) Domain starts at 0 CanadianDollars revenue up to a-intercept coordinate equal to twice the value of vertex of the Parabola:
183

(4) The maximum occurs at the vertex a-intercept coordinate:

$\frac{183}{2}$

or the amount 11163. CanadianDollars .
