

2. Given the graph of function v , which of the following choices is correct?

$v(-4) = -12$	j-intercept = $(0, 0), (-7, 0)$	range of $v = [-12, 0]$
$v(-7) = 0$	$v(3) = -6$	$v(-2)$ is positive
$v(0)$ is zero	domain of $v = [-7, 3]$	v-intercept = $(0, 0)$

$v(2)$ is negative	j-intercept = $(0, 0), (-7, 0)$	$v(-4) = -12$
domain of $v = [-6, 4]$	range of $v = [-13, -1]$	$v(0)$ is positive
$v(-7) = 0$	v-intercept = $(0, 0)$	$v(3) = -7$

domain of $v = [-7, 3]$	v-intercept = $(0, 0)$	$v(2) = -6$
j-intercept = $(0, 0), (-7, 0)$	$v(-7) = 0$	$v(0) = 0$
$v(3)$ is negative	$v(-4)$ is negative	range of $v = [-12, 0]$

$v(0) = -1$	$v(3) = -7$	$v(-2)$ is negative
$v(-4)$ is negative	$v(2) = -6$	v-intercept = $(0, 1)$
j-intercept = $(0, 0)$	domain of $v = [-7, 3]$	range of $v = [-12, 0]$

Solution
