

جدي مجموعة حل المعادلات الآتية في ص:

a. $8f + 2 = 26$

b. $y - 8 = 3$

$$\begin{aligned} f &= 6 \\ y &= 11 \end{aligned}$$

$$\begin{aligned} f &= 6 \\ y &= -5 \end{aligned}$$

$$\begin{aligned} f &= 3 \\ y &= 11 \end{aligned}$$

$$\begin{aligned} f &= 3 \\ y &= -5 \end{aligned}$$

Solution

a. $8f + 2 = 26$

$$8f = 26 - 2$$

$$f = \frac{24}{8}$$

$$f = 3$$

b. $y - 8 = 3$

$$y = 3 + 8$$

$$y = 11$$
