

Plotting the Parabola

How to plot : $w(n) = a n^2 + b n + c$

Step 1.

Examine the sign for the leading coefficient

If $a > 0$ then the valley shape: 

If $a < 0$ then the hill shape: 

Step 2.

Compute the vertex: $(-\frac{b}{2a}, w(-\frac{b}{2a}))$

Step 3.

Compute the w-intercept by setting $n=0$, $0^2 a + 0 b + c = c$

Step 4.

Compute the n-intercepts by solving: $a n^2 + b n + c = 0$

Step 5.

Sketch a rough plot, try to connect vertex to intercepts:
