

Plotting the Parabola

How to plot : $v(g) = a g^2 + b g + c$

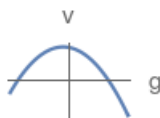

Step 1.

Examine the sign for the leading coefficient

If $a > 0$ then the valley shape:

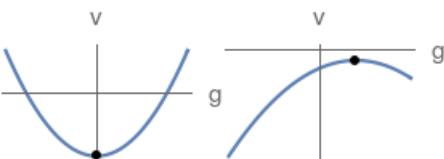

If $a < 0$ then the hill shape:

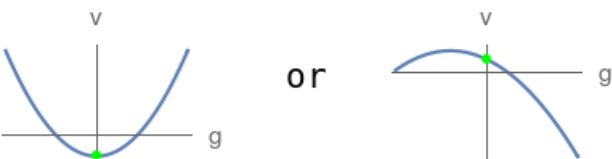

Step 2.

Compute the vertex: $(-\frac{b}{2a}, v(-\frac{b}{2a}))$

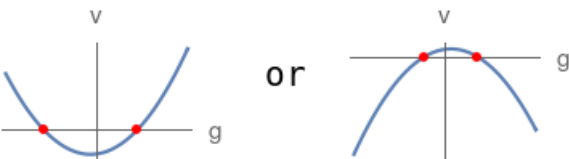

Step 3.

Compute the v-intercept by setting $g=0$, $0^2 a + 0 b + c = c$

Step 4.

Compute the g-intercepts by solving: $a g^2 + b g + c = 0$

Step 5.

Sketch a rough plot, try to connect vertex to intercepts:
