

4. The function whose graph is  $w=s^3$  , and is shifted to the right 7 units is:

$$w = s^3 - 7$$

$$w = (s+7)^3$$

$$w = (s-7)^3$$

$$w = s^3 + 7$$

**Solution**

After shifting to the right 7 units, the function becomes:  $w = (s-7)^3$
