

Example 1. 2 horizontal intercepts found

Plot $g(y) = 20 - y^2$

Step 1.

Compute vertex and plot single point:

vertex = $(0, 20)$

Step 2.

Compute g-intercept and plot single point:

g-intercept = $(0, 20)$

Step 3.

Compute y-intercepts by solving $20 - y^2 = 0$:

$(-2\sqrt{5}, 0)$, $(2\sqrt{5}, 0)$

Step 4.

connect the above computed points:

Step 5.

Extend the parabola beyond the range of intercepts
