

4.

$$3\text{ m} + 11\text{ c} + 8\text{ m} - 2\text{ c}$$

$$13\text{ c} - 5\text{ m}$$

$$13\text{ c} + 11\text{ m}$$

$$9\text{ c} + 11\text{ m}$$

$$13\text{ c} + 12\text{ m}$$

Solution

$$\begin{aligned} & 3\text{ m} + 11\text{ c} + 8\text{ m} - 2\text{ c} \\ &= (3\text{ m} + 8\text{ m}) + (11\text{ c} - 2\text{ c}) \\ &= 11\text{ m} + 9\text{ c} \end{aligned}$$
