

## Example 2. No horizontal intercepts found

Plot  $p(n) = n^2 - 8n + 176$

### Step 1.

Compute vertex and plot single point:

vertex = (4, 160)

### Step 2.

Compute p-intercept and plot single point:

p-intercept = (0, 176)

### Step 3.

Compute p-intercept reflected against vertex,

reflection = (8, 176)

### Step 4.

connect the above computed points:

### Step 5.

Extend the parabola beyond the range of intercepts
