

Example 1. 2 horizontal intercepts found

Plot $t(s) = -s^2 + 2s + 79$

Step 1.

Compute vertex and plot single point:

vertex = (1, 80)

Step 2.

Compute t-intercept and plot single point:

t-intercept = (0, 79)

Step 3.

Compute s-intercepts by solving $-s^2 + 2s + 79 = 0$:

$(1 - 4\sqrt{5}, 0)$, $(1 + 4\sqrt{5}, 0)$

Step 4.

connect the above computed points:

Step 5.

Extend the parabola beyond the range of intercepts
