

5. Given the graph of function a, which of the following choices is correct?

$a(-8)=0$	$a(3)=5$	domain of $a = [-8, 4]$
w-intercept = $(-8, 0)$	$a(-2)$ is negative	a-intercept = $(0, 1)$
$a(0)$ is negative	$a(4)=7$	range of $a = [0, 12]$

$a(4)$ is positive	range of $a = [-1, 11]$	w-intercept = $(-8, 0)$
$a(3)=5$	domain of $a = [-7, 5]$	$a(-8)=0$
$a(-2)$ is positive	$a(-5)=12$	a-intercept = $(0, 1)$

$a(-2)=6$	$a(-8)$ is zero	$a(0)$ is positive
range of $a = [0, 12]$	$a(3)=5$	domain of $a = [-8, 4]$
$a(-5)=12$	a-intercept = $(0, 1)$	w-intercept = $(-8, 0)$

$a(-2)$ is positive	a-intercept = $(0, 2)$	range of $a = [0, 12]$
$a(-5)=12$	domain of $a = [-8, 4]$	$a(3)=4$
$a(-8)$ is zero	$a(4)=6$	w-intercept = $(-8, 0)$

Solution
