

### Example 3. Vertex equal to vertical intercept

Plot  $m(p) = p^2 + 80$

#### Step 1.

Compute vertex and plot single point:

vertex = (0, 80)

#### Step 2.

Compute m-intercept and plot single point:

m-intercept = (0, 80)

#### Step 3.

There are no p-intercepts!

Instead compute an arbitrary point on any side of vertex:

Random point = (-8, 144)

#### Step 4.

Reflect the point against the vertex's vertical axes:

Reflection = (8, 144)

#### Step 5.

connect the above computed points:

#### Step 6.

Extend the parabola beyond the range of intercepts
