

Example 2. No horizontal intercepts found

Plot $m(f) = f^2 - 6f + 129$

Step 1.

Compute vertex and plot single point:

vertex = (3, 120)

Step 2.

Compute m-intercept and plot single point:

m-intercept = (0, 129)

Step 3.

Compute m-intercept reflected against vertex,

reflection = (6, 129)

Step 4.

connect the above computed points:

Step 5.

Extend the parabola beyond the range of intercepts
