Since I can't divide by zero (division by zero isn't allowed,

I need to find all values of h that would cause division by zero. The domain will then be all other h-values.

The domain is all values that h is allowed to be.

When is this denominator equal to zero? $h^2 = 16=0$

 $h=\pm 4$ then the domain of m is $\{h \mid h \neq 4 \text{ or } -4\}$
