$$(m\!-\!2)\ (m^2\!+\!4\ m\!+\!4)$$

$$(m-2) (m^2+2 m+4)$$

$$(m-2)$$
 $(m^2-2$ $m+4)$

 m^3-8

الحل:

 m^3-8

 $= m^3 - 2^3$

 $= (m-2) (m^2 + (m) (2) + (2)^2)$

 $= (m-2) (m^2+2 m+4)$
