7. Which of the following are correct calculations for difference quotient of: $k\left(y\right)=y+3$ $k\left(y\right)=y+3$ $k\left(y+h\right)=h+y+3$ =h+y+3 $\frac{k\left(y+h\right)-k\left(y\right)}{h}=\frac{\left(h+y+3\right)-\left(y+4\right)}{h}$

=1

$$k(y) = y + 3$$

$$k(y+h) = h + y + 3$$

$$= h + y + 3$$

$$\frac{k(y+h) - k(y)}{h} = \frac{(h+y+3) - (y+3)}{h}$$

$$= \frac{h}{h}$$

$$= \frac{h(1)}{h}$$

$$= 1$$

```
\begin{array}{c} k \, (\, y\,) \, = y \, + \, 3 \\ k \, (\, y + h\,) \, = h \, + \, y \, + \, 3 \\ = h \, + \, y \, + \, 2 \\ \frac{k \, (\, y + h\,) \, - k \, (\, y\,)}{h} \, = \, \frac{(\, h + y + 5\,) \, - \, (\, y + 3\,)}{h} \\ = \, \frac{h}{h} \\ = \, \frac{h \, (\, 1\,)}{h} \\ = \, 1 \end{array}
```

Solution
