$$(c+2) (c^2-2 c+4)$$
  
 $(c-2) (c^2+4 c+4)$ 

$$(c-2)(c^2+2c+4)$$

$$(c-2) (c^2-2 c+4)$$

 $c^{3} - 8$ 

## الحل:

$$= c^3 - 2^3$$

 $= (c-2) (c^2 + (c) (2) + (2)^2)$ 

$$= (c-2) (c^2+2 c+4)$$
