$$(r-2) (r^2+4 r+4)$$
  
 $(r-2) (r^2+2 r+4)$ 

 $r^{3}-8$ 

## الحل:

 $= r^3 - 2^3$ 

= 
$$(r-2) (r^2 + (r) (2) + (2)^2)$$
  
=  $(r-2) (r^2 + 2 r + 4)$
