$$(v-3) (v-2) (v+2)$$
 $(v-4) (v-3) (v+2)$ 
 $(v-2) (v-1) v$ 
 $(v-3) (v-1) (v+4)$ 

1.  $v^3 - 3v^2 + 2v$  has a factor (v-0) compute all other factors:

## Solution

Apply Long Division.

(v-2)(v-1)v
