$$(c+2) (c^2-2 c+4)$$

 $(c-2) (c^2+4 c+4)$

$$(c-2)(c^2+2c+4)$$

$$(c-2)(c^2-2c+4)$$

الحل:

- $= c^3 2^3$
- $= (c-2) (c^2 + (c) (2) + (2)^2)$
- $= (c-2) (c^2+2 c+4)$
