The domain is all values that c is allowed to be.

Since I can't divide by zero (division by zero isn't allowed,

I need to find all values of c that would cause division by zero. The domain will then be all other c-values. When is this denominator equal to zero? $c^2 - 9 = 0$ $c=\pm 3$ then the domain of t is $\{c \mid c \neq 3 \text{ or } -3\}$
