## Solution

To find the vertex, we look at the coefficients in the function  $e(y) = ay^2 + by + c$ in this equation, a=2 and b=9

Therefore, the vertex of the graph of f is  $(-\frac{9}{4}, -\frac{121}{8})$ 

The first coordinate of the vertex has the formula:  $\frac{-b}{2a}$  now, plugging into formula to get:

 $=-\frac{121}{9}$ 

 $\frac{-b}{2a} = -\frac{9}{2(2)} = -\frac{9}{4}$ 

The second coordinate of the vertex is  $e(-\frac{9}{4}) = 2(-\frac{9}{4})^2 + 9(-\frac{9}{4}) - 5$
