$$(x-4) (x^2+8 x+16)$$

$$(x-4) (x^2+4 x+16)$$
  
 $(x-4) (x^2-4 x+16)$ 

 $x^{3}-64$ 

## الحل:

 $x^{3}-64$ 

 $= x^3 - 4^3$ 

 $= (x-4) (x^2 + (x) (4) + (4)^2)$ 

 $= (x-4) (x^2+4x+16)$
