١. جدي مجموعة حل المعادلات الآتية في ص:

a. $4b + 8 = 32$

b. $j - 4 = 6$

$\boxed{\begin{array}{l} b = 9 \\ j = 10 \end{array}}$

$\boxed{\begin{array}{l} b = 9 \\ j = 2 \end{array}}$

$\boxed{\begin{array}{l} b = 6 \\ j = 10 \end{array}}$

$\boxed{\begin{array}{l} b = 6 \\ j = 2 \end{array}}$

Solution

a. $4b + 8 = 32$

$4b = 32 - 8$

$b = \dfrac{24}{4}$

$b = 6$

b. $j - 4 = 6$

$j = 6 + 4$

$j = 10$
