4.

The domain is all values that c is allowed to be.
Since I can't divide by zero (division by zero isn't allowed,
I need to find all values of c that would cause division by zero.
The domain will then be all other c-values.
 When is this denominator equal to zero?

$c^4 + 9 = 0$

impossible , then the domain of k is $(-\infty, \infty)$ i.e. $c \in \mathbb{R}$
