# Plotting the Parabola

How to plot : $q(z) = a z^2 + b z + c$

Step 1.
Examine the sign for the leading coefficent

If $a > 0$ then the valley shape:
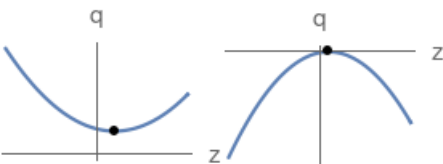

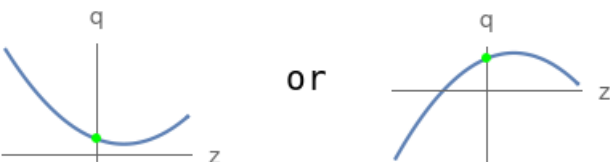

If $a < 0$ then the hill shape:

Step 2.
Compute the vertex: $\left(-\dfrac{b}{2a}, q\left(-\dfrac{b}{2a}\right)\right)$

Step 3.
Compute the q-intercept by setting $z=0$, $0^2 a + 0 b + c = c$

or

Step 4.
Compute the z-intercepts by solving: $a z^2 + b z + c = 0$

or

Step 5.
Sketch a rough plot, try to connect vertex to intercepts:

or
