1.

The domain is all values that p is allowed to be.
Since I can't divide by zero (division by zero isn't allowed,
I need to find all values of p that would cause division by zero.
The domain will then be all other p-values.
 When is this denominator equal to zero?

$p^2 - 9 = 0$

$p = \pm 3$ then the domain of b is $\{p \mid p \neq 3$ or $-3\}$
