2.
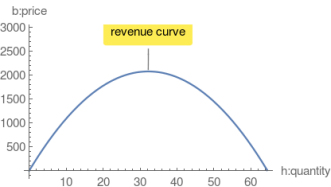

2. (1) Basis for the Revenue model is a simple multiplication:

Revenue = Price×Quantity = $(-2h+129) \times h = 129\,h - 2\,h^2$

Notice the latter is a quadratic:

(2) Domain starts at 0 Euros revenue up to h-intercept coordinate equal to twice the value of vertex of the Parabola:

$\frac{129}{2}$

(4) The maximum occurs at the vertex h-intercept coordinate:

$\frac{129}{4}$

or the amount 2080.12 Euros .
