1. Which of the following is correct intersection plot:

$j = 2e^2 - e - 2$

$j = e - \dfrac{25}{2}$

$m = -w^2 + 2w + 1$

$m = -w - 27$

$d = p^2 - 3p + 3$

$d = 3p - 6$

$q = -2g^2 - 2g - 3$

$q = \dfrac{15}{2} - 4g$

Solution

$d = p^2 - 3p + 3$

$d = 3p - 6$
